

## Disappointing result in Champéry

In Champéry I didn't reach my goal. But I could do some good training laps for the coming worldcup in July.

After a really fast start i couldn't hold the leading group. So I tried to find my own speed. Unfortunately I lost some air in the back tire in the first lap and I had to stop in the techzone to refill it. The technical parts weren't easy but my scalpel helped me to do it. I fought to catch some riders but at least I was not better then 9th.
